Abstract of Django Internship Project

Project Name: School student Management

In this project of School Student Attendance Management we will have 3 Roles

1. Class Teacher
2. Student
➢ Class Teacher can add and remove students and take attendance daily of his/her respective class and send reports to Parents through Mail
➢ Student can view his/her attendance

   Databases:
   o Users
   o Student Details (Name, Class/Standard)
   o Attendance (Absent and present count, marks , absent and present dates)

Idea of attendance database:

We will store count of which a student is absent and present.
